Overview

App-Upgrade for bar-waiter is needed

User's View

a) some changes concerning layout

	login: • layout doesn't matter • name, password, button, messageline
	• if login incorrect then comment in messageline • if login is correct and user not locked, all unsuccessful attempts are "forgotten"
	name of waitress in title here …
	…and here of course Kerstin has access only to her own orders
	admin get displayed all waitresses in a "List View" and a message line
	selecting an item shows this message

	"Long Click" shows this "Context Menu": Delete…selected waitress (and her orders) Unlock…selected waitress
	Add…shows this "Alert Dialog"[1] and appropriate message
	List…orders of selected waitress

[1] Hint: ask Google for appropriate examples or wait till next theory - lesson
