

Aim

Develop an application to administrate your Tupper parties.

User's view

	<ul style="list-style-type: none"> price....digits allowed
	<ul style="list-style-type: none"> list ordered by name
	<ul style="list-style-type: none"> duplicate articles not allowed
	<ul style="list-style-type: none"> date...only digits allowed member...combo box is empty at the beginning member...if not in combo box, then add it during „add“ member(inclusive date and article) article...contents of combo box corresponds with list
	<ul style="list-style-type: none"> list...chronologically sorted

- profit...calculates profit (= sum of prices of articles) on a given date

Hints

- member...set combo box editable
- also develop „generate.sh“ in order to build and run the application
