	Searching for <i>author</i> prints all books with this author

 <p>Login Screen Book Store x +</p> <p>http://localhost:8080/ServletBook/ListBooks?author=&amp;title=tou&amp;Search=Search</p> <p>List Books for user 'adam'</p> <p>author: Karl May title: Winnetou I</p> <p>found books:</p> <ul style="list-style-type: none"><li><input type="checkbox"/> 11: Karl May: Winnetou I</li><li><input type="checkbox"/> 22: Karl May: Winnetou II</li></ul> <p>Search Order Back</p> <p>type in author's name (hits: 3)</p>	<ul style="list-style-type: none"><li>o searching for title prints all books with the given string</li></ul>
 <p>Login Screen Book Store x +</p> <p>http://localhost:8080/ServletBook/ListBooks?author=Karl&amp;title=am&amp;Search=Search</p> <p>List Books for user 'adam'</p> <p>author: Karl May title: Schatz am Silbersee</p> <p>found books:</p> <ul style="list-style-type: none"><li><input type="checkbox"/> 33: Karl May: Schatz am Silbersee</li></ul> <p>Search Order Back</p> <p>type in author's name (hits: 4)</p>	<ul style="list-style-type: none"><li>o searching with author and title means printing all book with given author AND title (as above)</li></ul>
 <p>Login Screen Book Store x +</p> <p>http://localhost:8080/ServletBook/ListBooks?author=Karl&amp;title=&amp;Search=Search</p> <p>List Books for user 'adam'</p> <p>author: Karl May title: Winnetou I</p> <p>found books:</p> <ul style="list-style-type: none"><li><input type="checkbox"/> 33: Karl May: Schatz am Silbersee</li><li><input checked="" type="checkbox"/> 11: Karl May: Winnetou I</li><li><input checked="" type="checkbox"/> 22: Karl May: Winnetou II</li></ul> <p>Search Order Back</p> <p>type in author's name (hits: 5)</p>	<ul style="list-style-type: none"><li>o ordering books by selecting checkbox beside book-entries (see hints)</li><li>o and pressing <i>Order ...</i></li></ul>

	<ul style="list-style-type: none"><li>o leads to inserting selected books</li><li>o into table <i>orders</i> and</li><li>o printing actual list of ordered books of current user</li><li>o List of orders only appears after pressing button <i>Order</i>.</li></ul>
---	--

## Hints

- o additional table: **orders**
- o HTML: `<input type="checkbox" name="ckorder" value="approp. book-id">`
- o Servlet: `request.getParameterValues("ckorder")` returns `String[]`
