

Aim

Upgrade fisher's application.

User's view

	<p>adding takes with incorrect input data causes errors ...</p>
	<p>...2nd example (see hint)</p>
	<p>statistics: group by fish</p> <ul style="list-style-type: none"> - all fisher with weight of takes - total weight of takes

Hints

- use your own **Exception** – class to distinguish between different error - situations
