

Overview

The GoMobil – Obmann needs some additional features, like administration of monthly salary.

- a new salary – entry
- chronologically sorted entry (after inserting appropriate month)

Class SalaryEntry (Proposal)

order by ...

use DateFormatSymbols

for displaying value in JTable (use setScale(2))

Some General Hints

- Implementations in OS other than LINUX causes decrease of points.
- BigDecimal...calculating do with appropriate methods
- JTable - Cell-Alignment...use class DefaultTableCellRenderer
- **!!** changing key of an existing entry in TreeSet...treeset gets corrupted
 ⇒ remove entry → change key of entry → add it again into TreeSet
